ABOUT GALILEE

Galilee Intelligent Logistics Technologies Private Limited (GILT) is a Bangalore based company offering turnkey RFID and IoT Custom Engineered Smart and Secure business solutions. GILT is powered by a Management Team with Rich Solution Deployment and Project Management expertise in the RFID domain and with rich project deployment experience.

BUSINESS SOLUTIONS

Our solutions are built on the NEXT GENERATION RFID and IoT technology platforms. Our products are customizable and can be integrated with compatible technology thereby adding value and providing additional features like analytics. We have entered into collaborations with some of the top industry leaders in the business. Our solutions can be implemented globally through our chain of international partners.

EYE-SEAL

THE SMART BREACH DETECTION SYSTEM

One of our flagship solutions, the Eye-Seal is a smart internal container breach detection system.

ADVANTAGE EYE-SEAL

This Internationally patented solution is developed in collaboration with our US based OEM partner, Eye-Seal, USA, the pioneers in security systems.

- IoT sensor to detect and alert exporters with time and location details on container breach through door opening, temperature and humidity variation
- Works in over 180 countries with the same SIM card
- No need for direct line-of-sight to satellites to determine location
- Verifiable immediate & schedule alert report (VISAR) history that is equivalent to a survey report or extensive investigative efforts
- Fully connected DIGITAL device
- Reliable & tamper-proof internally installed device
- Provides a detailed end-of-voyage report totalling all breaches and internal environmental variations of the container

OUR USP

- Deep understanding of Customer domains
- Exposure to C gen technologies
- High Quality of Customer Service
- No need to replace existing legacy systems
 - data can be exported from our applications to these legacy systems

The USP

- Authenticated time stamped and live location reporting
- Door Opening Sensor
- Optic Sensor to detect tiny variations of light inside the container
- Temperature monitoring sensor
- Humidity and dew sensor
- Battery Status sensor

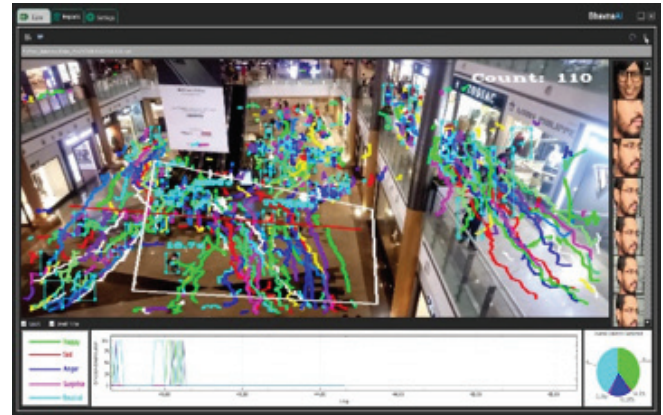

FACEAI-PRO

COMPUTER VISION. ARTIFICIAL INTELLIGENCE.

The next generation facial recognition security system.

ADVANTAGE FaceAI

- Real Time Face Recognition, Face Detection and Tracking
- Not dependant on camera model
- High rate of efficiency (99.5%) for face recognition and Detection
- Works from almost 40 -50 ft
- Can process images from multiple IP cameras
- Can be used in Retail, Law & Order, Entertainment
- Emotion Analytics
- Crowd Analytics

Partner
M/S CamfyVision

i-INVENTORY

INSTANT AUDIT CHECK

An RFID and IoT tool for high speed and high accuracy inventory tracking, location and audit. A major tool for LEAN management

ADVANTAGE I-inventory

- Designed to enable the end user customize it to the specific needs of the business.
- It is an ideal solution for retail, shipping accuracy, wearhouses, Defense, Research Laboratories, File tracking and the health care industry

- An excellent tool for asset and inventory audit, location tracking, location of mis-placed inventory, Reducing inventory shrinkage and removal of dead inventory.
- Can be integrated with features to improve Asset Life Cycle and ensure optimum performance of Assets.
- Helps reduce costs in terms of time and man-power

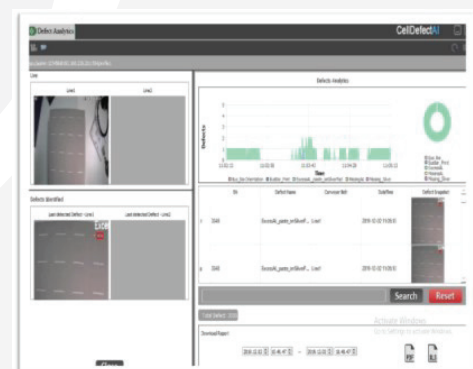

i-Trailer

INTELLIGENT PAPERLESS DOCUMENTATION

An RFID and IoT enabled solution integrated with IP Surveillance cameras, Boom barriers and traffic signaling equipment

ADVANTAGE I-Trailer

- Enables quick and paperless tracking of the vehicles at the port.
- Enables enhancement of security levels at the ports through authentication
- Reduces waiting time at the ports.

I-CITS

SMART CONTAINER INVENTORY

A Solution built on RFID and IoT design frames.

ADVANTAGE I-CITS

- Helps in quick and easy detection of the location of a particular container, map the movement of containers
- Ultra-fast location of a specific container in a container yard
- Engineered to meet the specific requirements of the customer, keeping in mind size and transaction volumes
- Can be integrated with an application from where data can be exported to legacy applications

SMART STORE

AUTOMATING STORE PROCESSES

A Solution built on RFID and IoT design frames.

ADVANTAGE Smart Store

- Optimize business process
- Improve quality of service to customers
- Reduced waiting time for the customer
- Ultra fast and accurate audit of inventory
- Locate misplaced/missing inventory
- Reduce shrinkage
- Inventory analytics
- Avoid inventory stock out
- Increase security.
