

Engineering Smart Secure Solutions

FEATURES OF EYE-SEAL

- Unique, one of its kind digital solution for the Export Trade.
- Solution with sensors, mounted inside the container, to detect container breach, light variation, temperature variation, humidity threshold variation, dew
- Alert exporters immediately on event occurrence through GSM using a Global SIM with time and location details on container breach through door opening, top or sides breach, temperature, humidity variations.
- SIM is global and works in 180 countries
- No need of direct line of sight to determine locations
- Timely VISAR (Verifiable immediate Satellite Reports) will be sent through email. (Refer to the PPT to view the alert sample report).
- Fully connected digital device with IoT platform
- Reliable and tamper proof internally mounted device.
- Provides a detailed end of voyage report totalling all breaches and internal environment variations of the container.

The Unique Selling Point

- Authenticated time stamped and live location reporting
- Independent Door opening Sensors
- Optic sensors to detect light variations inside the container
- Temperature, humidity, dew point sensors and battery status sensor
